

TARA SALEH

Full-Stack Engineer
Creative Coder
Hackathon Winner

PROFILE

A passionate full stack developer for mobile and web with a diverse background in Business, Legal Consultancy and Makeup Artistry and entrepreneurial spirit. Finding software development merging all three areas of my interest and skillset involving creativity, logistics and analytics. I am passionate about lifelong learnings and solving puzzles which is how I describe my development style.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEERING INSTRUCTOR – General Assembly
Mar 2022 – Present

- Teach and guide students through a rigorous, transformational journey towards apprenticeship in software development.
- Conduct code-along lessons to help students understand the concepts and learn industry best practices and standards.

FULL STACK DEVELOPER (web & mobile) – iContribute
Dec 2021 – Present

- Build new features from scratch and write clean, maintainable code while iterating and shipping rapidly
- Exhibit engineering excellence with a sense of urgency and by mentoring and collaborating with remote team members through code reviews and pairing.
- Provide detailed documentation, hand-off material, and training to Marketers, Product Owners and Developers as necessary.

PERSONAL PROJECTS

Bluem - Hackathon Project (Theme: *Financial Literacy*)

- Lead a team of 4 to create a *MERN* stack a children's financial management tool with features to enable teaching and illustrating the concepts of earning, saving, banking and investing. This project won General Assembly's Financial Wellness Hackathon.

INNERTUNER - *React -Express -MongoDB -Nodejs -Tailwindcss*
